

# CONTROL TECHNIQUES

# COMMANDER C

FLEXIBILITY FOR COUNTLESS APPLICATIONS

AC DRIVES, GENERAL PURPOSE

**DRIVE OBSESSED**

# THE 6TH GENERATION OF EXCELLENCE IN MOTOR CONTROL

## COMMANDER C

0.25 kW to 132 kW (0.33 hp to 200 hp)

Linear V to F, Square V to F, Dynamic V to F,  
Set Point V to F, Stator Resistance Compensation,  
RFC-A (enhanced open-loop performance)

**Commander C combines efficiency and reliability to offer optimum performance for a wide range of applications.**

With 9 frame sizes, it covers powers from 0.25 to 132 kW / 0.33 to 200 hp. Essential features are built in, including PLC capabilities for simple programming needs, dual STO safety function (C300 variants only), braking transistor and PID control.

### Free 5 year warranty\*

Our Commander C series is built to cope with harsh environments. In fact, it is so reliable we are confident enough to supply it with a free five-year warranty.

Now you can buy with the same confidence.

# THE ULTIMATE ALL-IN-ONE DRIVE

# KEY BENEFITS

## Adaptable to your application

Whether you have a single application or a variety of different ones, Commander C fits right in. With all essential features built-in, it's ready to go right out of the box.

## Integrated functional safety

The Dual Safe Torque Off (STO) feature, certified to the highest level of machine safety, SIL3/PLe, and compliant to EN/IEC 61800-5-2, prevents the motor from moving unexpectedly, protecting both equipment and operators.

## On-board PLC

The generous 30kB user space allows for add-on programmable functions, more elaborate I/O features and special software that enables greater machine control. The on-board PLC also eliminates the need for an external controller, saving both on cost and space.

## Compact design

Commander C is one of the most compact drives within its category, taking little space in the cabinet and minimizing installation cost.

## Super quick start-up

To get started you only need to set-up 4 parameters (motor rated current, RPM, voltage and power) and for your convenience we've listed them on the front cover of the drive.

## Flexible connectivity

The plug in communication modules enable integration with the most common industrial fieldbuses.

## Worldwide availability and outstanding service

Need expert advice and support? Wherever you are in the world we've got you covered via our sales offices or Control Techniques approved distributors.

# CASE STUDY: GIVING BACK TO NATURE AT SINGAPORE BOTANICAL GARDENS

# COMMANDER C DRIVES SAVE ENERGY

Established in 2012, Success Electric Pte Ltd specialises in manufacturing low-voltage switchgear and control gear assemblies for diverse market sectors in Singapore and numerous global projects. The company's electrical power distribution solutions range from main switch boards (MSB) to distribution boards (DB). It also provides motor control and automation panels for air conditioning & mechanical ventilation (ACMV) systems, plumbing & sanitary, fire pump, refuse chute, and machinery control systems.

## The Challenge

Singapore Botanic Gardens is the first and only tropical botanic garden on the UNESCO World Heritage List. Its new Gallop Extension is eight hectares of framed landscapes composed of native plants and forests, contributing to the gardens' rich heritage and its role in research, conservation, education, and recreation. As a natural extension of the gardens' nature area, it covers the rain forest and the learning forest, educating visitors on forest ecology and conservation significance.

With a new addition to the visitor attraction, the Botanical Gardens required an irrigation booster pump system to supply water to the entire Gallop Extension field of plants and forests. On winning the contract, Success Electric set about the mission to find the right drive for the job.

## The Solution

Control Techniques' Commander C drives are integrated into Success Electric's irrigation booster pump system controller. Commander C controls and regulates the pumps to distribute the water supply to the entire field of native plants and forests at programmed times of the day and night, keeping the plants watered while saving energy and natural resources. Commander C provides a low starting current while ramping up to full speed at 50Hz, thus reducing the overall energy consumption. The easy-to-use LED keypad and a parameter guide on the front of the drive allow the gardens' maintenance team to modify the pressure settings for the pump sets.

## The Benefit

"The solution has reinforced the energy saving benefits that variable speed drives deliver. In this case, Singapore Botanical Gardens is making energy savings of 30%. With the compact and programmable Commander C drives, we were able to reduce the panel footprint, leaving more space for nature that visitors can enjoy."

**Anthony Yeo**

Success Electric  
Business Manager

# CASE STUDY: SIMPLIFYING SYSTEM DESIGN AT SCHULTHESS

# COMMANDER C DRIVES WITH BUILT-IN LAUNDRY FEATURES

Schulthess is the leading Swiss supplier of washing equipment. Ever since its inception in 1845, durability and performance have been at the core of the solutions designed and built by the company. The Schulthess laundry equipment is easy to operate, economical to use and boasts excellent process reliability. Each machine has been tested for 30,000 cycles – equivalent to a lifetime of 20 years.

The company is constantly investing in research and development, which has helped to secure only the highest grade materials and processes for durable and environmentally-friendly products.

## The Challenge

As they've embarked on a new product development, the Schulthess team has been on the lookout for an inverter drive supplier that can meet their demands for quality and performance, while also offering a technological advantage and satisfying the regulatory requirements. Inverter drives are crucial components in the design of the laundry solution as proprietary inverter drive technology provides smooth, reliable power for better wash and extraction, reduces energy and water consumption and improves the customer experience.

## The Solution

The Swiss and UK team at Control Techniques have worked closely with Schulthess' R&D department to provide the best match to their needs. Commander C, with the built-in laundry specific software, proved to be the right solution. Commander C can detect imbalances caused by laundry becoming tangled into large lumps and initiate a tumbling sequence to untangle the load. Thanks to this feature the wash cycle is much smoother and the machine life is extended as there's less stress to the mechanical parts.

The on-board PLC has allowed the joint teams to further expand the laundry specific capabilities while also reducing the size of the installation as an external controller was no longer required.

Commander C is built to cope with harsh environments and we are confident in its durability to supply it with a free 5 year warranty. This has been a valued benefit to guarantee the quality of the Schulthess machinery.

## The Benefit

“Since switching to Commander C, we have been able to simplify the system design. For example, we no longer need an imbalance sensor. Imbalance detection and broken belt detection are all built-in the PLC. Commander C's motor control performance is outstanding, and it has greatly improved our testability and troubleshooting compared to the previous drive.

Throughout this project, we have had excellent support from the Control Technique teams in the UK and Switzerland and it's been a great working partnership. We will most certainly use Control Techniques' inverters for our future projects.”

**Mr. Remo Bucher**  
Engineering Manager

# COMMANDER C DRIVES AT THE HEART OF GENERAL PURPOSE APPLICATIONS WORLDWIDE

## Conveyors

- Reliable speed control with fieldbus communications
- S-ramp acceleration / deceleration profiling provides smooth speed transitions minimizing machine jerk
- Overload capacity up to 180% for rapid acceleration or load changes
- Built-in STO function ensures operator safety by preventing the motor from moving unexpectedly

## Access Control

- Smooth motion with enhanced open loop control
- Compact physical size allows the drive to be mounted easily in small control cabinets
- Highly reliable in harsh environments, providing long lasting service

## Lifts, Hoists, Winches

- Adjustable mechanical brake sequencing with torque proving function – no need for an external controller
- Embedded PLC functionality can manage local I/O reducing the need for an external controller

### Process

(Mixers, Crushers, Agitators, Centrifuges, Extruders)

- Ease of integration to external PLC or other management systems through powerful networking options
- Conformal coating for enhanced environmental protection
- Overload capacity up to 180%
- Highly stable motor control

### Pumps, Fans, Compressors

- Improved energy efficiency during periods of low demand
- On board PLC & PID functionalities make advanced control easy and efficient without the need of an external controller
- Skip Frequencies allow users to easily avoid equipment resonant frequencies, reducing high vibration levels
- Supply Loss Ride Through will keep the drive up and running through most power outages

# COMMANDER C

## KEY FEATURES

### Easy motor pairing and performance control

#### V/Hz by default for easy set-up

- Slip compensation
- Multi-motor control
- 100% torque available to 1 Hz
- Square law V/F mode
- Dynamic V/F mode
- Auto tune (stationary and rotating)

#### Enhanced open loop Rotor Flux Control

- Closed current loop for greater stability
- Auto tuning (stationary and rotating)

### Flexible connectivity

The SI Interface on Commander C enables integration with a wide range of industry standard fieldbuses to allow remote control and diagnostics across different networks. Additionally, the AI-485 Adaptor option permits connection to RS485 networks using Modbus RTU.

## Robust and reliable design

- PCBs conformal coated for resilience to harsh environments
- Patented air flow system cools and protects components
- Supply voltage tolerance for smooth operation during disturbances to supply
- Intelligent three speed user replaceable fan with failure detection
- Trip avoidance features take action instead of tripping out:
  - i. Load shedding reduces speed at current limits
  - ii. Supply loss ride-through keeps motor running during brown outs
- High overload capability: 180% for 3 seconds (RFC-A mode) or 150% for 60 seconds (Open loop mode)
- IP20 ingress protection as standard and conduit box UL Type 1 available as an accessory

## Embedded intelligence reduces costs

- Onboard PLC
- Built-in independent PID control

## Energy saving

- Dynamic V/Hz - improves efficiency by reducing motor losses during low demand
- 98% efficient - only 2% of energy is lost during the conversion process
- Low power standby mode - drives can be idle for significant periods, saving energy
- Automatic 3-speed cooling fan - keeps energy usage & acoustics noise to a minimum by intelligently responding to load and the environment
- Square Law V/F mode - optimized for quadratic loads to reduce motor losses

## Input / Output

### Onboard as standard

- 3 x Analog I/O
- 5 x Digital I/O
- 1 x Relay
- 2 X STO (C300 only)

### SI-I/O

- 4 x Digital I/O
- 1 x Digital input
- 3 x Analog inputs (default) / Digital inputs
- 2 x Relays

# COMMANDER C INTUITIVE SOFTWARE

## Intuitive commissioning software

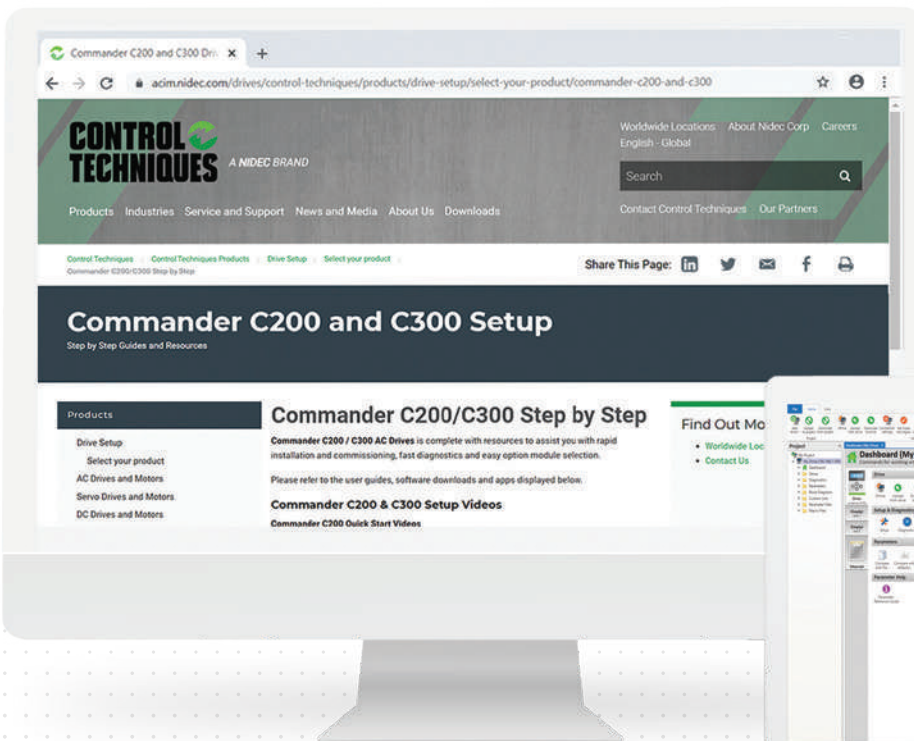

For fast task based commissioning and easy maintenance, **Connect** offers a familiar Windows™ interface and intuitive graphical tools to enhance data analysis.

The dynamic drive logic diagrams allow the visualisation and control of the drive in real time. The parameter browser enables viewing, editing and saving of parameters as well as importing parameter files from our legacy drives.

## Advanced machine control

For more advanced applications, **Machine Control Studio** provides a flexible and intuitive environment for programming. This is possible thanks to the onboard PLC that increases the drives functionality at no extra cost.

Control Techniques also provides support for customers' own function block libraries, with on-line monitoring of program variables with user defined watch windows and help for on-line change of program, in line with current PLC practice.

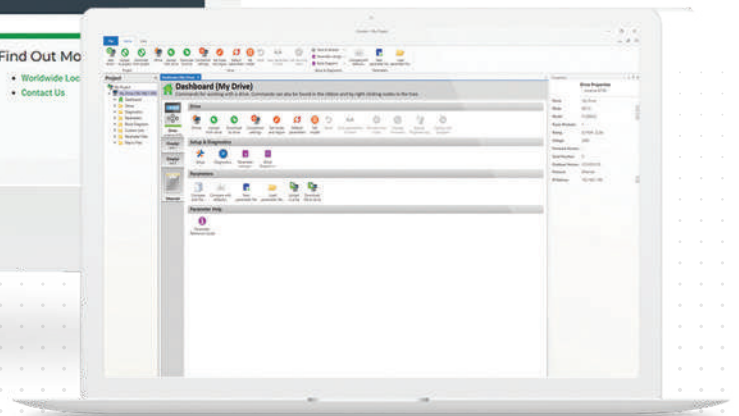

Connect Software

Machine Control Studio Software

# COMMANDER C VIRTUAL DEMO TOOL

The **Commander C Virtual Demo Tool** provides a safe and accessible first experience with Commander C variable speed drives and allows you to get familiar with its keypad and menu structure.

This digital replica of a Commander C drive, motor and control allows you to use the virtual keypad to set-up the drive parameters for commissioning just like in a real situation. Once the key parameters have been set, the drive can be enabled and the motor shaft will spin.

To see just how easy it is to set-up the drive, visit: [www.controltechniques.com/virtual-demo-tool](http://www.controltechniques.com/virtual-demo-tool)

## Diagnostics? There's an app for that

### Diagnostic Tool App

The Diagnostic Tool App is a fast and simple tool, which allows users to quickly solve any error codes that the drive may show.

Download from:  
[controltechniques.com/mobile-applications](http://controltechniques.com/mobile-applications)

## Free online help: [Drive-Setup.com](http://Drive-Setup.com)

You'll have permanent free access to lots of web pages with useful information, like user manuals, 'how-to' videos and guides.

### YouTube Training

Access a series of Commander C training videos, available on YouTube, visit:

# SPECIFICATIONS

Power & Control	
Supply Requirements	100 V drive: 100 V to 120 V $\pm 10\%$ 200 V drive: 200 V to 240 V $\pm 10\%$ 400 V drive: 380 V to 480 V $\pm 10\%$ 575 V drive: 500 V to 575 V $\pm 10\%$ 690 V drive: 500 V to 690 V $\pm 10\%$ Maximum supply imbalance: 2 % negative phase sequence (equivalent to 3 % voltage imbalance between phases)
Input Displacement Power Factor	0.97
Phase	1 and 3 (model dependent)
Power Range	0.25 to 132 kW / 0.33 to 200 hp
Input Frequency Range	45 to 66 Hz
Output Frequency/Speed Range	0 to 550 Hz
Switching Frequency	Size 1 - 4: 0.667, 1, 2, 3, 4, 6, 8, 12 & 16 kHz Size 5 - 9: 2, 3, 4, 6, 8, 12 & 16 kHz (Factory default = 3kHz)
Heavy Duty Overload Capability	150 % for 60 s (open loop mode), 180 % for 3 s (RFC-A mode)
Operating Modes	Linear V to F Square V to F Dynamic V to F Set Point V to F Stator Resistance Compensation RFC-A (enhanced open-loop performance)
Stopping Modes	Coast, Ramp, Ramp & DC Injection Braking, DC Injection Braking with 0 Hz detect, Timed DC Injection Braking, Built-in braking transistor, external resistor required
Communication & Interfaces	
Communications	Modbus RTU EtherCAT PROFIBUS Ethernet DeviceNET CANopen PROFINET POWERLINK (all available with AI/SI-options)
Keypads	Fixed LED keypad Remote IP66 Keypad (available as an accessory) Remote RTC Keypad (available as an accessory) HMI (available as an accessory)
User Software Tools (Free To Download)	Connect (PC commissioning & cloning tool) Machine Control Studio for on-board PLC programming
Inputs & Outputs	
Analogue	2 x Analogue input Possible settings: 0-10 V, 0-20 mA, 4-20 mA (No Alarm), 4-20 mA (Alarm), 4-20 mA (Error) 1 x Analogue output Possible settings: 0-10 V
Digital	3 x Digital inputs (1 frequency input) 1 x Digital input / output programmable 1 x Digital input / output programmable (can be used as a frequency or PWM output to represent analogue value)
Digital Input Logic	Positive
Relay	1 x Relay (single pole, relay)
Accuracy	Frequency 0.02%, Analogue input 1: 11 bit plus sign, Analogue input 2: 11 bit. Current typical 2%.
Extra I/O with SI-I/O Option Module (Available as an Accessory)	3 x Analogue inputs (default) / Digital inputs programmable 4 x Digital input / output programmable 1 x Digital input 2 x Relays

Mounting & Environment	
IP Rating	IP20 Conduit Box UL Type 1 ingress protection (available as an accessory)
Storage Temperature	-40 °C to 60 °C (-4 °F to 140 °F)
Operating Temperature Without De-Rate	-20 °C to 40 °C (-4 °F to 104 °F)
Operating Temperature with De-Rate	-20 °C to 60 °C (-4 °F to 140 °F) Frames 1 to 4 -20 °C to 55 °C (-4 °F to 131 °F) Frames 5 to 9
Cooling	Integral cooling fan
Altitude	≤3000 m (≤1000 m no de-rate; 1000 m to 3000 m derate 1 % every 100 m)
Humidity	95 % non-condensing at 40 °C / 104 °F - EN61800-2(3k3)
Pollution	Pollution degree 2 - dry, non-conducting pollution only
Vibration	Reference standard IEC60068-2-27, IEC60068-2-29 bump test, IEC60068-2-64 random vibration test, IEC60068-2-6, EN61800-5-1 sinusoidal vibration test. Tested to Environmental Category ENV3
Mechanical Shock	Tested in accordance with IEC 60068-2-27 and IEC 60068-2-29
Mounting Methods	Frame 1 to 4 – Surface mount via mounting holes or DIN Rail mount Frame 5 to 9 – Surface mount via mounting brackets or through-panel mount via through-panel mounting kit
Mounting Clearance	0 mm either side, 100 mm above and below
Overvoltage Category	Category III (IEC/EN/KN/UL 61800-5-1)
Corrosive Environments	EN 60721-3-3 ISO9223 Class C3
Maximum Motor Cable Length	75 m Frame 1   100 m Frames 2 to 4   200 m Frames 5 to 6   250 m Frames 7 to 9

14	Analog input 1/2 select	Digital input 5	0 to +24 Vdc
31(35)**	Safe Torque Off/Drive enable	STO 2	0 to +24 Vdc
32(36)**	0V STO 2	0V STO 2	0V common for STO 2
33(32)**	0V STO 1	0V STO 1	0V common for STO 1
34(31)**	Safe Torque Off/Drive enable	STO 1	0 to +24 Vdc
41	Status relay (drive OK)	Normally open contact	2 A, 240 Vac, 0.5 A, 30 Vdc inductive load
42			
51 †	0V common	Common for backup supply	
52 †	+24 Vdc external supply	Backup control supply	24 Vdc, 40 W

#### Notes

\* C300 uses STO, so terminal 11 is unassigned

\*\* Frames 1 to 4 (Frames 5 to 9) - different terminals by frame size

Frames 1 to 4 - the 0V terminals on the Safe Torque Off are isolated from each other and the 0V common

Frames 5 to 9 - the 0V terminals on the Safe Torque Off are not isolated from each other and the 0V common

The Safe Torque Off / Drive enable terminal is a positive logic only input

† Terminal 51 and 52 must be connected to an external 24 V power supply if backup is required (frame sizes 6-9 only)

# COMMANDER C

# ORDERING GUIDE

## How to select a drive

### Electrical Considerations

- What is the supply voltage?
- Single or three phase input power?
- What is the motor rating?
- Continuous current – FLA (Full Load Amps)
- Select the drive based on motor Amps rather than power rating

### Drive Mechanical Mounting

- Panel mounting – as standard
- Wall mounting – UL conduit kits are available
- Through panel mounting – frames 5 and up

Frame size	Dimensions H x W x D mm (in)	Weight kg (lb)
1	160 x 75 x 130 (6.3 x 2.95 x 5.1)	0.75 (1.65)
2	205 x 75 x 150 (8.07 x 2.95 x 5.9)	1.3 (3.0)
3	226 x 90 x 160 (8.9 x 3.54 x 6.3)	1.5 (3.3)
4	277 x 115 x 175 (10.9 x 4.5 x 6.9)	3.13 (6.9)
5	391 x 143 x 200 (15.39 x 5.63 x 7.87)	7.4 (16.3)
6	391 x 210 x 227 (15.39 x 8.27 x 8.94)	14 (30.9)
7	557 x 270 x 280 (21.93 x 10.63 x 11.02)	28 (61.70)
8	804 x 310 x 290 (31.65 x 12.21 x 11.42)	52 (114.6)
9E	1069 x 310 x 290 (42.09 x 12.21 x 11.42)	46 (101.4)
9A	1108 x 310 x 290 (43.62 x 12.21 x 11.42)	66.5 (146.6)

For Normal Duty applications,  
use Heavy Duty ratings.

Note: The listed ordering codes are for C200, 50 Hz default setting.  
 For C300 change the model digits (C200-xxxxxxxxxxxxxxxx) from C200 to C300.  
 For 60 Hz change the Regional Default Setting digits (xxxx-xxxxxxxx00xxxx) from 00 to 01.

# ORDERING GUIDE

## Optional keypad Order code

Remote Keypad		82500000000001
Remote keypad RTC		82400000019600

## Optional accessories Order code

AI-Back-up Adaptor		82500000000004
AI-Smart Adaptor		82500000018500
RS485 cable		4500-0096
AI-485 24 V Adaptor		82500000019700

## SI option modules Order code

(available from frame size 2 and upwards)

SI-EtherCAT		82400000018000
SI-PROFIBUS		82400000017500
SI-Ethernet		82400000017900
SI-DeviceNet		82400000017700
SI-CANopen		82400000017600
SI-PROFINET		82500000018200
SI-I/O		82400000017800
SI-POWERLINK		82400000021600

### Through hole IP65 kit\*

Frame Size	Order Code
5	3470-0067
6	3470-0055
7	3470-0079
8	3470-0083
9A	3470-0119
9E	3470-0105

### Finger-guard grommet

Frame Size	Order Code
9A / 9E	3470-0107

### Line reactor

Frame Size	Order Code
9E (400 V)	7022-0063

### Lifting tool

Frame Size	Order Code
9A	7778-0045
9E	7778-0016

### Fan replacement kit

Frame Size	Order Code
1	3470-0092
2	3470-0095
3	3470-0099
4	3470-0103

\*IP65 / UL TYPE 12 rating is achieved on the rear of the drive when through panel mounted using the following kits.

\*\*These mounting brackets ensure the drive can be mounted on existing Commander SK installations.

\*\*\*Commander C built-in EMC filter complies with EN/IEC 61800-3. External EMC filters are required for compliance with EN/IEC 61000-6-4 as per the table below.

### UL Type 1 conduit kit

Frame Size	Order Code
1	3470-0091
2	3470-0094
3	3470-0098

# DRIVE OBSESSED

**Control Techniques has been designing and manufacturing the best variable speed drives in the world since 1973.**

**Our customers reward our commitment to building drives that outperform the market. They trust us to deliver on time every time with our trademark outstanding service.**

More than 45 years later, we're still in pursuit of the best motor control, reliability and energy efficiency you can build into a drive. That's what we promise to deliver, today and always.

# #1 FOR ADVANCED MOTOR AND DRIVE TECHNOLOGY

**Nidec Corporation is a global manufacturer of electric motors and drives.**

Nidec was set up in 1973. The company made small precision AC motors and had four employees. Today, it's a global corporation that develops, builds and installs cutting-edge drives, motors and control systems in over 70 countries with a workforce of more than 110,000.

You'll find its innovations in thousands of industrial plants, IoT products, home appliances, cars, robotics, mobile phones, haptic devices, medical apparatus and IT equipment all over the world.
